

320 Photovoltaic panel weight

Overview

A standard 320-watt photovoltaic panel typically weighs between 18 kg to 25 kg (39.7 lbs to 55 lbs), with most residential-grade models clustering around 19-23 kg. This weight makes them manageable, but still requires careful lifting during installation. However, the exact dimensions depend heavily on the panel's technology, wattage, and the manufacturer's design. Understanding these specifications is crucial for determining roof load capacity.

Renogy 320W Monocrystalline Solar Panel can provide about 1600 Watt-hours of electricity per day (5-6 hours of direct sunlight), ensuring a consistent output over 80% for 25 years. The "Bridge" (Total Roof Load): A standard 20-panel residential system will add approximately 800 to 1,000 lbs of load. REC Solar's REC320PE72 is part of the Peak Energy 72 Series.
