

# Abandoned solar power station

## Overview

---

A massive solar farm of two million panels in the Mojave Desert is heading for dormancy just 11 years after going into operation. The Ivanpah installation was once the largest project of its kind in the world, but its future is bleak. Abandoned power plants, once buzzing with activity and providing electricity to communities, now stand as eerie remnants of a bygone era. These silent giants, with their crumbling structures and rusted machinery, hold a unique allure for explorers and photographers seeking to capture the beauty in . In Altamont, one hour's drive east of San Francisco, California, there are approximately 5,000 wind turbines. It was slated to close in 2026, but that decision has been reversed by the California Public . The best abandoned desert solar stations can be found across various regions.

## Abandoned solar power station
