

# Announcement of discontinuation of production of photovoltaic silicon panels

## Overview

---

December 25, 2024 - In a strategic move that has sent ripples through the global renewable energy sector, two of the world's leading polysilicon manufacturers, Tongwei and Daqo Energy, announced substantial production cuts on the evening of December 24th. SH) also announced the news of production cuts. Due to the dry season in the southwest during winter and a rise in electricity prices . REC Silicon is shutting a polysilicon plant in Moses Lake, Washington, that has struggled to achieve customers' quality requirements. The plant is one of only a few in the US that manufactures the solar panel raw material, making the closure a blow to efforts to create a US solar supply chain. The reason given for the shutdown was the inability to "improve the level of some key impurities," according to a press release. The company said it attempted . Hanwha Solutions Corp. , the energy unit of South Korea's chemicals-to-financial conglomerate Hanwha Group, will likely withdraw from the polysilicon production business in the US by pulling the plug on the last polysilicon plant in the US, run by Norwegian firm REC Silicon ASA.

## Announcement of discontinuation of production of photovoltaic silicon
