

Are photovoltaic panels a new energy source Why

Overview

Solar energy is a form of renewable energy, in which sunlight is turned into electricity, heat, or other forms of energy we can use. It is a "carbon-free" energy source that, once built, produces none of the greenhouse gas emissions that are driving climate change. There are several ways to turn . There are two main types of solar energy technologies-photovoltaics (PV) and concentrating solar-thermal power (CSP).
