

# Are you tired of moving photovoltaic panels now

## Overview

---

The short answer is yes, you can relocate solar panels to your new house. Remove the panels yourself, but have a solar installer reinstall . Discussion of solar photovoltaic systems, modules, the solar energy business, solar power production, utility-scale, commercial rooftop, residential, off-grid systems and more. Solar photovoltaic technology is one of the great developments of the modern age. But many homeowners don't have long-term plans. Job changes, family needs, and shifting priorities can shorten how long someone stays in a home-sometimes shortly after solar is installed. The average solar shopper saves between \$37,000 and \$154,000 over 25 years-not including any potential incentives-transforming what feels like a significant upfront cost into substantial long-term savings.
