

Can an outdoor base station be installed indoors

Overview

Antennas generally perform best when they're out in the clear, but there is no law that says you can't use an outdoor antenna indoors. If you have some sort of attic in your home, apartment or condo, you're in luck. A lightning arrestor (often referred to as a lightning protector or surge arrestor) is a protective device installed in a transmission line or power system. Its job is to shunt high-voltage surges-like those from a lightning strike-safely to ground, preventing them from damaging equipment further . The base station supports a large storage capacity, allowing videos to be stored locally and securely on SD cards ranging from 16GB to 256GB. You can view live footage without activating the camera, thus conserving energy and enhancing efficiency. It's also useful to hunters, campers or explorers who want to set up a . Should be up high and outside for 2 reasons.
