The examples below relate to Section 503.2 and Section 503.3, and are intended to provide guidance on the relationship between the maximum authorized real power, maximum authorized charging power

Canada Adopts UL 9540 DC BESS Certification

Canada's energy storage market is shifting toward modular UL 9540-certified DC BESS systems paired with certified inverters. Learn how this change boosts design flexibility, speeds

Energy Storage 101 - Energy Storage Canada

Energy storage captures energy when it is produced and stores it for later use through a variety of technologies including, but not limited to, pumped hydro, batteries, compressed air, hydrogen

Clean Electricity Regulations (

Regulations are current to 2026-03-17 and last amended on 2025-01-01. Previous Versions Enabling Act: CANADIAN ENVIRONMENTAL PROTECTION ACT, 1999

Clean Electricity Regulations: maintaining reliability

The Government of Canada agrees with the Canada Electricity Advisory Council that ensuring reliability requires the development of power supply, storage, and transmission.
