

China builds solar power stations

Overview

China expands the world's largest solar park on the Tibetan Plateau, boosting clean energy with wind, and AI-powered data centers. China's space program has pulled off another epic feat! The "Sun Chaser Project" space solar power station, built by a team led by Academician Duan Baoyan of Xidian University, has just completed its second phase of testing. This system harvests solar energy from a geosynchronous orbit 36,000 . China gears up to develop solar power stations in space that can transfer the sun's energy in the orbit back to the ground on Earth. It draws from the idea of space-based solar power. The South China Morning Post (SCMP) reported that a senior rocket scientist, Long Lehao, is leading this ambitious endeavor. He likens this project to "another .
