

# Cost of Grid-Connected Charging Stations for Users in Vietnam

## Overview

---

AC Charging Stations (Wall Charging): Prices range from 200 to 1,000 USD depending on power and features. Vietnam EV Charging Infrastructure Market, valued at USD 1.2 Bn, is growing due to government support, urban development in Hanoi and Ho Chi Minh City, and rising EV demand. EVN, PV Power, and the Entry of Energy Giants Not to be outdone, energy companies like EVN and PV. New electricity rates for electric vehicle charging stations have been adjusted, ranging from 1,565 VND/kWh to 3,835 VND/kWh for medium voltage and above. Notably, peak hours see a significant increase up to 4,298 VND/kWh. This change directly impacts the operation of charging stations and the. Towards Net Zero Transport: Technical Report on EV Charging Network Development and Grid Integration to Support Viet Nam's Road Transport Infrastructure Development Plan The study aims at promoting electric vehicle charging station infrastructure development through developing principles. The Vietnam electric vehicle (EV) charging market experienced substantial growth in Q4 2024, driven by increasing EV adoption, expansion of charging infrastructure, and strategic partnerships.

## Cost of Grid-Connected Charging Stations for Users in Vietnam

---

### Electric Vehicle Charging Stations Placement Optimization in

This study aims to propose an optimization model using Mixed-Integer Nonlinear Programming (MINLP) to implement an optimal location strategy for EVs charging stations in Ho Chi Minh (HCM) City. The

### [Automotive: Vietnam introduces separate electricity tariff for EV](#)

Vietnam has introduced a separate electricity pricing mechanism for electric vehicle (EV) charging stations under Decision 14/2025, effective May 29, Nguoi Quan Sat has reported.

### Towards Net Zero Transport: Technical Report on EV Charging

The study also assesses power demand and the impact of charging stations on the grid, as well as financial mechanisms to promote investment in charging stations in Viet Nam.

### Vietnam EV Charging Market , 2019 - 2030 , Ken Research

The AC Charging Stations segment leads the market due to their widespread availability and lower installation costs compared to DC Fast Charging Stations. AC stations are commonly used in

## Vietnam EV Charging Market Report

Read the latest trends about EV Charging Infrastructure in Vietnam. Get comprehensive industry data, trends, and forecasts instantly. Click to download now!

### [Electric Vehicle Charging Stations in Vietnam: The Race That Can't](#)

Investment cost is a significant challenge, with each fast-charging station costing up to billions of VND. Moreover, power infrastructure in many localities is inadequate to meet the high

### **Electric Vehicle Charging Station Prices: Situation in**

Detailed analysis of electric vehicle charging station prices in Vietnam and the latest development trends, attracting the attention of investors.

### [Trends in EV Charging Infrastructure Development in Vietnam and the](#)

To promote EV adoption, the government is considering incentives such as tax breaks, financial support, electricity pricing regulations for public stations, and mandatory charging station

### [Vietnam proposes new electricity pricing for EV charging stations](#)

The rapid growth of electric vehicles (EVs) in Vietnam is driving a surge in electricity demand for charging stations, with rates for these

facilities expected to be set between industrial and

## VinFast adjusts the price of electric vehicle charging

On March 19, VinFast adjusted the charging fees for electric cars and motorcycles in Vietnam. Specifically, starting from March 19, at VinFast's public charging stations, the charging rate
