

Cyprus imports energy storage batteries

Overview

The Energy Ministry is working on a "behind the meter" initiative that uses batteries to store electricity from commercial solar panel projects across the country. Private companies are complaining that Transmission System Operator Cyprus (TSOC) is favored at a current tender for three units of 40 MW each. EMA, the . Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, addressing the country's growing need to manage excess green energy production. In a presentation on the government's strategy aimed at reducing electricity prices, the minister said "this is . As energy prices in Cyprus continue to rise and solar adoption accelerates, more businesses are turning to Battery Energy Storage Systems (BESS) to take control of their energy use. A commercial battery energy storage system in Cyprus can store solar energy, reduce grid reliance, support net . The Apollon PV Park has commissioned a 3.3 MWh BESS as part of the Apollon PV Park.
