Cyprus Launches First Major Battery Energy Storage System

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and

[Battery Storage Systems for Solar in Cyprus: Complete 2025 Guide](#)

These batteries thrive in Cyprus conditions, operating optimally between 15-35°C - exactly what your shaded garage provides year-round. Each unit weighs just 100-125kg and mounts

Cyprus Approves Big Battery Energy Storage System Project

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is

Cyprus regulator approves TSO-owned battery storage

Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System

Cyprus Switches on First Significant Battery System

The Apollon PV Park's combined solar and storage system represents a practical step toward modernizing Cyprus's energy landscape. By reducing reliance on traditional energy sources

BIG BATTERY STORAGE SYSTEM PROJECT FOR ENERGY

The plan in question is to construct a facility that can support over 59 Megawatts and run over 120 MWh in circulation. The construction of this facility will greatly ease the burden on Cyprus, which today has

[Cyprus plans 160MW battery storage systems to manage renewable](#)

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday,

Cyprus switches on first significant battery system

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University of
