

# Distributed energy storage using American-made explosion- proof outdoor cabinets

## Overview

---

These cabinets with explosion relief wall panels release when air pressures reach 20 psf inside the chamber to prevent a damaging explosion. They have air vents, spill containment sumps, generous room for drum storage and durable construction. The OD-62DDC is a premier heavy-duty outdoor enclosure designed for versatile telecommunications and equipment racking applications. Crafted from DDB Unlimited's proprietary AlumiFlex®, it is significantly lighter than steel yet robust enough to support the heaviest equipment. Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies. As a joint venture with a legacy dating to 2009, we've refined our energy storage cabinet through four generations of innovation. Scalable from Residential to Utility.
