

Dominica Energy Storage Power Station New Project

Overview

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. 5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity. How . Illustration of a sustainable energy concept in Dominica Dominica is taking a pragmatic step towards energy security and sustainable development, aligning with the global shift towards decarbonisation and infrastructure modernisation. The commissioning of a 6 MW / 6 MWh Battery Energy Storage . In 2025, the Independent Regulatory Commission (IRC) will conduct site visits to assess various electricity generation projects, as part of its mandate to ensure a reliable and adequate electricity supply.

Dominica Energy Storage Power Station New Project

World Bank supports clean energy generation in Dominica

The project will create a strong network for transmission of electricity with redundancy between key power plants and the demand center, to withstand known natural hazards in the area
