Dublin microgrid design

[Pure DC plans natural gas microgrid at Dublin data center campus](#)

European data center firm Pure is launching a microgrid at its campus in Dublin, Ireland. Pure Data Centres (Pure DC) and power firm AVK this week announced the launch of a 110MW on

[Pure DC Dublin data-center microgrid adopts dual-fuel power strategy](#)

The campus operates a 110-megawatt on-site microgrid using natural-gas generators supported by battery storage. The engines are designed to run on dual fuels, allowing the facility to

[Powering AI: Europe switches on first microgrid data center in Dublin](#)

Just outside Ireland's capital, Dublin, a data center has become the first in Europe to turn to an independent, so-called "islanded," microgrid to keep its servers running. Europe is looking to

Europe's first microgrid shows the grid is no longer enough

Dublin's microgrid matters, then, not because it settles a marketing argument about who was first, but because it shows where Europe is heading. The continent's digital expansion is no

[Europe's first 110 MW data centre microgrid launches in Dublin](#)

Pure Data Centres Group and AVK have launched Europe's first large-scale 110 MW on-site data centre microgrid at Pure DC's Dublin campus, designed to provide dispatchable power

Europe's First Microgrid: Pure DC in Dublin, Ireland

With its DUB01 project, Pure DC faced a unique challenge: providing reliable power to a new data centre entirely disconnected from the grid. In stepped AVK to design and implement a

Pure DC and AVK Launch Europe's First Large-Scale 110MW Data

In a significant move to address the critical power constraints facing Europe's digital infrastructure, European data center operator Pure Data Centres (Pure DC) has partnered with

Pure DC Unveils Dublin's Off-Grid Microgrid for Data Center

The facility in Dublin, Ireland, was completed in partnership with on-site power provider AVK. The 110-MW on-site microgrid is designed to support early-phase operational resiliency.

Pure DC and AVK Deploy Europe's First Data Centre Microgrid

While several microgrids are already in operation in the US, until today there were none of these deployments in Europe. This project demonstrates how carefully designed onsite

energy

Pure DC launches 110 MW data center microgrid in Dublin

Pure Data Centers Group (Pure DC), a London-based, privately owned hyperscale developer and operator, has deployed Europe's first large-scale, on-site 110 MW microgrid at its
