

# Energy function of grid-connected inverter

## Overview

---

A GTI or grid-tied inverter is connected to solar panels for converting direct current (DC) generated by solar panels into alternating current (AC). But before that we will begin with the grid tie inverter working principle. What is Grid Tie Inverter and what . Grid-Following Inverters (GFLI) and Grid-Forming Inverters (GFMI) are two basic categories of grid-connected inverters.

### Grid-tie inverter

A grid-tie inverter converts direct current (DC) into an alternating current (AC) suitable for injecting into an electrical power grid, at the same voltage and frequency of that power grid.
