European independent energy storage projects

2025 BESS Projects Transforming Energy Storage Across Europe

Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives.

ENGIE to expand European BESS portfolio in Spain and France

ENGIE has announced plans to expand its European battery energy storage systems (BESS) portfolio with the acquisition of two projects in Spain totalling 278MW and the start of

[Europe's energy storage buildout: who leads and who is left behind](#)

The analysis is based on WoodMac's proprietary utility energy storage project database, mapping the development stages, countries, company types, ownership structures and technologies

Our Battery-Based Energy Storage projects and achievements

TotalEnergies develops battery-based energy storage solutions, which are essential complements to renewable energies, mainly in Europe and the United States.

Energy Storage Europe , The Unified

Voice of Energy Storage

This position paper assesses the system value of long-duration energy storage, identifies barriers to deployment, and proposes recommendations to better align European energy, industrial, and

[The European Energy Storage Inventory: A comprehensive overview](#)

This innovative tool systematically catalogizes all energy storage projects within Europe, from the first planning phase to operational operation.

Key Projects, Initiatives and Market , JRC SES

Under the EU's flagship research programs, Horizon Europe and Horizon 2020, numerous energy storage projects are being funded to develop innovative, scalable storage solutions.

[ENGIE accelerates the deployment of battery storage with nearly 400](#)

With 700 MW of projects already in operation or under construction, the Group reaches more than 1 GW of BESS capacity in Europe. ENGIE is accelerating the development of Battery

New EU Platform Highlights Over 1771 Energy Storage Projects

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy

Europe's new energy storage map: 80 GWh awarded through

In just one year, more than 80,000 MWh were tendered through public schemes in at least ten European countries, ranging from capacity markets to RRF funds. Poland led with 20 GWh,
