

Export volume of solar module industry companies

Overview

The world's top 10 solar photovoltaic (PV) module manufacturers shipped a record 500 gigawatts (GW) of modules in 2024, nearly doubling the previous year's volume, according to Wood Mackenzie's new Global Solar Module Manufacturer Rankings 2025 report. The adoption of solar energy is growing rapidly worldwide, with cumulative installations amounting to more than 2.2 terawatts as of the end of 2024. Between 2025 and 2029, global solar photovoltaic capacity additions are projected to increase yearly and range from some 655 gigawatts in 2025 to 930 . This report includes summary data for the photovoltaic industry from annual and monthly respondents. Summary data include volumes in peak kilowatts and average prices. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe – and created more than 300 000 manufacturing jobs across the solar PV . In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2. According to Volza's Global Export data, World exported 88,345 shipments of Solar Module from Nov 2023 to Oct 2024 (TTM).

Export volume of solar module industry companies

U.S. Energy Information Administration

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

China's Solar PV Dominance & Global Shifts , Enerdata

As of total market share based on PV modules shipments, Jinko Solar leads with 13%, followed by Longi, Trina solar, and JA Solar, each with around 11%. The next tier includes TW solar

Solar Market Insight Report Q4 2025

Corning began production at its Michigan ingot and wafer factory, bringing the last remaining major piece of the solar module value chain to the US (polysilicon, ingot, wafer, cell, and

Executive summary - Solar PV Global Supply Chains

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In

Spring 2025 Solar Industry Update

Corning, Suniva, and Heliene have announced a

Solar Module Exports from World

Globally, the top three exporters of Solar Module are China, Vietnam, and India . China leads the world in Solar Module exports with 103,827 shipments, followed by Vietnam with 95,537 shipments , and

partnership to create a U.S.-made solar module supply chain. Corning will supply polysilicon and wafers, Suniva will make the cells, and

[Solar Supply Chain and Industry Analysis , Solar Market Research](#)

NLR conducts detailed supply chain analysis for specific photovoltaic module technologies. These analyses include production locations, supply chain risk and costs, and material
