

# Flexible solar panels are large

## Overview

---

Flexible solar panels are less efficient than rigid panels but have a wider variety of applications due to their flexibility and thin size (typically 200 micrometers). Recently, organic silicon cells have been used to make flexible solar panels. This product has sustainability features recognized by trusted certifications. Manufactured on farms or in facilities that protect the rights and/or health of workers. They are ideal for curved or lightweight surfaces like RV rooftops, tents, or boats.
