

Georgia Standard Energy Storage System

Overview

The company-owned Wadley BESS is designed to "quickly dispatch stored energy over a four-hour period" and will "strengthen reliability and support the growing mix of renewable resources on Georgia's electric system. ". The new facility will store renewable energy for use during peak demand periods and is expected to finish by 2027. Credit: Georgia Power/PRNewswire. US-based Georgia Power has commenced construction on a battery . Georgia Power recently started construction on a new 260 megawatt (MW) battery energy storage system (BESS) in Jefferson County, Ga. just outside of the City of Wadley. The project, approved by the Georgia Public Service Commission (PSC), is located beside the existing third-party owned Wadley .
