

Home Solar Photovoltaic Power Generation Report

Overview

Discover predicted solar output data based on your location, orientation, and other parameters of your solar panels. Enhance PVWatts ® with features tailored to your specific needs! We collaborate with companies, universities, and organizations to privately fund new capabilities or analyses. Your investment drives innovation while benefiting the broader energy community.

California Distributed Generation Statistics (DGStats) is the California Public Utilities Commission's official public reporting site of all distributed generation projects that are on a customer's site or property in California's investor-owned utility service territories. DGStats will soon grow . The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. Following a low second quarter, the industry is ramping up as the end of . We expect small-scale solar capacity across all three sectors will grow from 44 gigawatts (GW) in June 2023 to 55 GW by the end of 2024. Before investing in a photovoltaic project, understanding its potential is crucial.

Home Solar Photovoltaic Power Generation Report

Utility-Scale Solar Data Update , Energy Markets & Planning

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Calculate your solar panel output for free with PVGIS

The tool provides month-by-month breakdowns of expected solar production, showing how output varies throughout the year based on seasonal sun angles and weather patterns.

[PVsyst Power Generation Report for Solar Projects , Solyug Energy](#)

Get accurate PVsyst power generation reports for solar projects with detailed yield prediction, shading analysis, and loss assessment. Our simulations ensure optimized design, project feasibility, and

Professional Solar Forecast for PV output

Discover predicted solar output data based on your location, orientation, and other parameters of your solar panels. Fill out the form below and see the current solar production forecast or historical output

How Much Energy Does a Solar Panel Produce in 2025?

CaliforniaDGStats

California Distributed Generation Statistics (DGStats) is the California Public Utilities Commission's official public reporting site of all distributed generation projects that are on a customer's site or

Discover how much energy solar panels actually produce in 2025. Get real-world data, calculations, and factors affecting solar panel output. Free calculator included.

PVWatts Calculator

Estimates the energy production of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to easily develop

Solar Market Insight Report Q4 2025

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating

Short-Term Energy Outlook

We forecast small-scale solar PV capacity using historical monthly data of small-scale capacity reported in our Monthly Electric Power Industry Report.

Trends in PV Applications 2025

The IEA PVPS Trends in Photovoltaic Applications

2025 report provides comprehensive data and analysis on global PV deployment, technology, and market evolution from 1992 to 2024.
