

Homemade solar panel follow-up light

Overview

An easy-to-follow video that showcases how you can make a homemade solar light circuit for your garden. This vlogger suggests using a 5V solar panel but the same guide can be applied to a 12V circuit as well. Solar lights, ranging from garden lights to night lights, including motion sensor lights and party lights, are sold for all areas of your household. The result will be impressive and eco-friendly lighting that makes your outdoor areas more stunning on . To make solar lights, you'll need a few components like solar panel, rechargeable batteries, LEDs, and a controller circuit. The solar panel absorbs sunlight to convert it into electrical energy, which is then stored in the batteries; at night, this stored energy powers the LED lights. Before diving into the DIY process, it's . Solar lanterns and lamps are a great way to decorate your garden or house for different occasions or as permanent lighting.
