

**How many days will it take for
the photovoltaic panel
registration to be completed**

Overview

Review and permit issuance typically range from about 3 weeks to 3 months, depending on jurisdiction volume, project complexity, and resubmittals. Where SolarAPP+ is available and your design qualifies, permits may be issued the same day. The permitting process follows six steps: system design, application submission, review and approval, installation, inspection, and Permission to Operate (PTO) from your utility company. California's streamlined permitting initiatives, including SolarAPP+ and the California Solar Permitting . According to the World Energy Investment 2023 report, the average permitting time for renewable projects in the United States is approximately two years. This contrasts with the European Union's regulatory limit, which aims for around one year for similar projects. However, it can take up to a maximum of 30 business days.
