## Overview

---

The cost of storage technology in Brazil has been falling consistently: average battery pack prices fell by 20% in 2024, reaching \$115/kWh, and should reach \$69/kWh by 2030. The Brazilian Association of Storage Solutions (ABSAE) estimates that the country could reach 25 GW of installed capacity and attract BRL 44 billion (\$8 billion) in investments during this period. The combination of distributed generation, electromobility, extreme weather events, and pressure for . Energy storage batteries stabilize renewable power supply, reduce grid dependency, and lower electricity costs. Here's what's driving demand: Rising electricity tariffs: Residential rates increased by 18% in 2023, pushing consumers toward solar + storage solutions. 5 billion and 5 GWh of capacity through 2027, demand could be high for the 2025 procurement exercise. 8 billion) in investment by 2030, according to a study by Brazilian developer NewCharge Energy.
