

How much does a lithium battery pack cost in Southern Europe

Overview

At 115 USD/kWh, a 75-kWh battery would cost 8,625 dollars or about 8,220 euros. These are average values - some LFP packs are likely to be noticeably cheaper, while the battery packs of high-performance cars are . Sale! Sale! . The 2025 Battery Price Survey, conducted by BloombergNEF, found that the cost of BEV cells was \$79/kWh, which represented 80% of the total pack price. The average price of battery packs fell 20% in 2024 to \$115 per kilowatt-hour (kWh), a significant . The largest cost driver for BEVs is the battery pack, which typically accounts for 30 to 40 percent of a vehicle's total cost. Even though costs have fallen significantly in the past few years, large battery packs can cost as much as €15,000 for incumbent OEMs. But here's the kicker- European energy storage systems still pay 20-65% more for batteries than Asian buyers [2]. What's causing this price gap, and when will Europe catch up?

Let's break down .

How much does a lithium battery pack cost in Southern Europe

[BloombergNEF: EV battery prices most hit by higher materials cost](#)

Average battery pack prices were lowest in China, at US\$84/kWh. Pack prices in North America and Europe were 44% and 56% higher, reflecting higher local production costs and greater

EV batteries now cost 115 USD per kWh on average

For a 50 kWh pack, it would be 5,750 dollars or 5,480 euros. These are average values - some LFP packs are likely to be noticeably cheaper, while the battery packs of high-performance

Lithium battery packages

Connector block double - high model - for CATL 8S - 12S - ID3 - ID4 battery modules EUR 23,90 Ex. VAT

EU expects battery pack price of less than \$100/kWh by 2026/27

In 2026/27, the average pack price is expected to fall below \$100/kWh, based on raw material costs, competition, and pressure from alternative technology such as Na-ion batteries, which
