

# How to charge the mobile base station power supply

51.2V 300AH

## Overview

---

Charging with a standard household AC outlet is typically the fastest and most efficient method for most portable power stations. As the standard power source in most homes, AC outlets provide consistent power, while charging speed depends on the power station's input rating and . The Nomad Base Station is an indoor mobile phone and smartwatch charger that operates using an AC power source. 1 Gen 1) Type-A port and one USB Type-C port, providing users with the flexibility to charge different devices. The charger also supports wireless . 2. 2 Put the coil position of the mobile phone in alignment with the coil corresponding to the charging board, and the mobile phone will enter the corresponding charging indicator state, indicating that the charging work is in progress. It requires a license in United States but can be used license-free in Canada. Each option has its own unique benefits, so it is important to consider all of them before deciding which one is right for you.
