

Huawei Cyprus lithium battery energy storage project

Overview

The project would combine 72MW of solar PV with a 41MW/82MWh lithium-ion battery energy storage system (BESS), making it the largest to-date of either technology type. [pdf] Why Northern Cyprus Energy Storage Companies Are Powering. At the core of this development is the installation of HUAWEI's Smart String Energy Storage System (LUNA2000-97kWh) at the Cyprus . The photovoltaic plant with storage,an investment estimated to be to the tune of EUR77. 15m,is planned to be built near the villages of Akaki and Kokkinotrimithiain the Nicosia district. It would span an area of 820,000m² of state land,which would be taken under a lease. The . Poised to be the world's first fully clean energy-powered tourist destination, the Red Sea Project's microgrid developed by Huawei can cover a development of 28000 sq km to power an airport, 50 hotels, 8000+ luxury rooms, a seawater destination, and one million tourists annually.
