

# India s energy storage solar ranking

## Overview

---

Karnataka, Chhattisgarh and Gujarat were the top three states in terms of cumulative installed storage capacity. India's cumulative installed energy storage capacity reached 490 megawatt-hours (MWh) as of the end of June 2025, according to a report released by Mercom India on . Mercom's India Solar Market Leaderboard report covers market shares and rankings across the Indian solar supply chain in . In the calendar year 2025, 119 gigawatts (GW) of solar . India's installed renewable energy capacity is expected to increase to about 170 GW by March 2025 from the level of 135 GW as of December 2023 \* Ministry of New and Renewable Energy targets 500 GW non-fossil-based electricity generation by 2030, as per the Prime Minister's COP26 announcement, with . India is rapidly transforming into a global leader in energy storage solutions, driven by its ambitious renewable energy targets and a growing need for sustainable power systems. With advancements in battery technology, grid storage, and renewable energy integration, Indian companies are at the . The report said India would need 930GW of solar capacity and around 2,560GWh of battery storage. According to a new report from energy think-tank Ember, solar-plus-storage could supply up to 90% of India's electricity demand at a levelised cost of electricity (LCOE) of INR5. The report . s, compiled by Debmaly ner .

## India's energy storage solar ranking

---

### Solar-plus-storage could meet 90% of India's power demand

According to Ember, solar-plus-storage could theoretically supply up to 90% of India's total electricity demand.

### Research

India's cumulative installed battery energy storage capacity reached 1,082 megawatt-hours (MWh) as of December 2025. In the calendar year 2025, 119 gigawatts (GW) of solar
