

Indonesia Solar Power Plant

Overview

The new initiative features plans for 80 GW of 1 MW solar minigrids with accompanying battery energy storage, to be deployed across 80,000 villages, alongside 20 GW of centralized solar power plants. In recent years, the . Jakarta, August 7, 2025 - Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar. 6 MW as of the first half of 2023, this is an increase of over 800% in the last 10 years. This is expected to contribute 33. Of the total global . For further details about existing capacity and operations of the electricity sector, see information about the state-owned Indonesian electricity company Perusahaan Listrik Negara. There are different types of thermal power plants based on .

Indonesia Solar Power Plant

Top five solar PV plants in operation in Indonesia

Listed below are the five largest active solar PV power plants by capacity in Indonesia, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to

[100 GW Solar Power Plant for Indonesia's Energy Self-Sufficiency and](#)

With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable

List of power stations in Indonesia

The following lists some of the larger power stations in Indonesia. Data are not included for a large number of small isolated plants (mostly diesel) in the Outer Islands.

Photovoltaic (PV) solar power plants in Indonesia

As the government commits to reducing greenhouse gas emissions and promoting sustainable energy, a significant increase in solar power plants has been observed across the nation.
