

# Inner solar photovoltaic power generation

48V 100Ah

## Overview

---

The Inner Mongolia autonomous region is leveraging its abundant wind and solar power potential to revolutionize its energy landscape, transforming itself into a hub for clean, sustainable power generation, the region's officials said on Friday. According to the energy bureau in North China's Inner Mongolia autonomous region, in the first quarter of this year, Inner Mongolia added 3.85 million kW of photovoltaic energy to its capacity, accounting for 7. Located in China's seventh largest desert, the project has a total installed capacity of 160 MW, including 80 MW of photovoltaic power, 40 MW . The project is now operational and able to generate 3. Covering 7,347 acres, the project has an investment of 6.7m) and combines solar power generation with environmental conservation.

## Inner solar photovoltaic power generation

---

### **Kubuqi solar and wind power base project**

Located in China's seventh largest desert, the project has a total installed capacity of 160 MW, including 80 MW of photovoltaic power, 40 MW of wind power, and other energy resources.
