

Japanese power plant energy storage project

Overview

Japanese financial services group Orix is set to build one of the country's largest power storage facilities, partnering with Tesla Inc. for the supply of industrial-scale batteries. In Hiroshima, Sumitomo Heavy Industries, Ltd. The system turns air and recycled industrial cold into clean electricity - showcasing a scalable, zero-emissions alternative to fossil-based backup power and supporting Japan's . The large-scale energy storage facility "EV Battery Station Chitose" in Hokkaido, began operations in 2023. Today we . According to Storage Discover, on February 4, 2025, Nikkei News and several other media outlets reported that Tesla (TSLA. O) has entered into a partnership with Japanese financial services group ORIX to provide a Megapack energy storage system with a total capacity of 548 megawatt-hours (MWh) for . Strategic acquisition establishes an immediate, localized footprint in Japan, advancing Energy Vault's global own & operate strategy in a high-growth, underpenetrated market Transaction includes onboarding of a proven local Japanese development team and 350 MW of advanced-stage projects targeted to . Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030.
