

Kiribati small solar power generation system

Overview

The EKLIPSE project aims to sustainably improve power supply and access in the Line Islands with a focus on renewable energy (solar PV and BESS integrated with existing diesel generators), efficiency and local capacity building. More than 1,000 people living on Arorae Island, Kiribati's southernmost outer island, will soon have access to clean, reliable electricity through a new solar mini-grid and battery storage system. STREP has three outputs: (i) solar . Kiritimati Island, the world's largest coral atoll and a key development hub for Kiribati with a rapidly growing population (currently roughly 8,000 people), has a dilapidated electricity micro-grid plagued by blackouts/brownouts and extending to only 40 percent of the island's population. The project involves the installation of rooftop solar photovoltaic (PV) hybrid systems with battery energy . Loading.
