

Latvia BESS wind and solar energy storage power station

Overview

Construction began in July 2025 and is expected to be completed in May 2026. Once operational, the project will deliver renewable electricity to the Latvian grid and enhance flexibility in the power system through the co-located battery facility. This autumn, the Battery Energy Storage System (BESS) will be connected . In news from Europe's Baltic Sea region, Latvia's first utility-scale battery storage project has been commissioned, while Fotowatio Renewable Ventures (FRV) has entered the Finland market. The project combines a 65 MW solar PV plant . Renewable energy company Utilitas Wind has inaugurated the largest battery energy storage system (BESS) in Latvia to date, local media reported. This acquisition will pave the way for the construction of a new photovoltaic (PV) solar power plant with a capacity of 400 megawatts .

Latvia BESS wind and solar energy storage power station

Latvia: first BESS opens ahead of Russia grid uncoupling

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north

Largest battery energy storage system (BESS) in Latvia opened

Renewable energy company Utilitas Wind has inaugurated the largest battery energy storage system (BESS) in Latvia to date, local media reported. Installed at the Targale wind farm in

Latvia's largest battery energy storage system unveiled

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in

[European Energy divests combined solar and battery park in Latvia to](#)

The Saldus project combines a 65 MW solar PV facility with a 46 MW battery energy storage system (BESS). Construction began in July 2025 and is expected to be completed in May 2026.

SUNOTEC Acquires 400MWp Solar, 600MWh BESS Project Site in

European Energy divests 50% of Latvian solar-BESS project

European Energy has agreed to sell a 50% stake in its Saldus solar and storage project in Latvia to Sampension, one of Denmark's largest pension funds. The Saldus project combines a

European renewable energy provider SUNOTEC has finalized the acquisition of SIA DSE Lazas Solar's solar and energy storage project in Latvia from Danish Sun Energy.

[European Energy divests combined solar and battery park in Latvia to](#)

Copenhagen, Denmark, October 23rd, 2025 - European Energy has agreed to divest 50 per cent of its Saldus project in Latvia to Sampension, one of Denmark's largest pension funds. The

[Latvia adds big batteries to complete grid sync with Europe, two major](#)

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the
