

Lithuania's energy storage participates in the electricity market

Overview

A new participant has joined the electricity balancing market organized by Litgrid, the Lithuanian electricity transmission system operator, and submitted its first bids - a 1 MW power and 2 MWh capacity energy storage battery system, built by Green Genius in the Alytus district. Lithuania has reached a significant renewable energy milestone, with its total solar capacity climbing to 3,040 MW by the end of 2025. Driven by progressive state policies and a robust prosumer market, the country added approximately 600 MW in a single year. Number of the market participants regulated by NERC in the electricity sector in 2023.

Lithuania's energy storage participates in the electricity market

Lithuania ups BESS scheme by EUR37m, Trina to deploy 180MWh

Via its battery energy storage system (BESS) arm, Trina Storage, it will deploy three 30MW/60MWh projects totalling 90MW/180MWh in Anyksčiai, Skuodas, and Jonava via a
