The trend accelerated into early 2026, with imports rising another 15.93 million tons in January and February alone, or about . The Russian police raids in Yekaterinburg targeting the Azerbaijani diaspora appear to have been triggered by a complex mix of internal intelligence turf wars, geopolitical messaging to Baku, and concerns over organized crime tied to foreign ethnic networks. The main causes behind these raids: 1. The challenge of loadshedding in South Africa has evolved from a temporary inconvenience into a defining constraint on how buildings, infrastructure and energy systems are designed. At the Solar & Storage Live Africa 2026, held at the Gallagher Convention Centre, a panel of industry experts . While Vehicle-to-grid (V2G) technology using private plug-in electric vehicles (P-PEVs) can balance the loads, its potential at megacity-level remains unclear due to the complexity of fine-grained, user-centric modelling. Here, we propose a Mobility and V2G Coupled (MOVC) framework, which depicts .
