PowerPoint Presentation

During a grid blackout, the BESS at Delimara may be requested to provide support by independently restarting sections of the grid, ensuring grid resilience by providing critical initial power to facilitate the

Delimara Power Station

The Delimara power station is located near Marsaxlokk in the southeast of Malta and is the newest power plant in Malta. It was put into operation in 1992 and redeveloped to LNG in the 2010s.

Malta containerized power generation BESS

Malta launches tenders for two large-scale Battery Energy Storage Systems (BESS) at Marsa and Delimara power stations to boost renewable energy integration and grid

[Malta's Gas and Power Project: A Visionary Leap Towards Energy](#)

At the heart of the project was the establishment of a state-of-the-art liquefied natural gas (LNG) facility, a new power plant, complemented by the conversion of existing oil-fired power stations

Delimara power station

Malta Inc. Clean, Flexible Power and Heat at Scale

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy.

[Delimara power plant to get 60MWh battery energy system back-up](#)

The project is proposed by the government company Interconnect Malta for a 4,900sq.m site at the Delimara plant. The BESS will provide a reliable energy source of up to 60MWh in the

Delimara power station is an operating power station of at least 547-megawatts (MW) in Marsaxlokk Bay, South Eastern, Malta.

About Delimara Power Plant

Construction began with the clearing of the old HFO (Heavy Fuel Oil) power plant and regasification sites in the winter of 2016. Facilities were finalised in 2017.

LNG in Malta

With this change in power generation, and the decommissioning of the older plant, Malta is now free from all dependency on heavy fuel oil, providing Malta with a cleaner and more cost-effective energy

About us

The Delimara Power Station complex at Marsaxlokk includes the four electricity generation plants that we dispatch on a daily basis to provide the electrical energy required by our
