

# Myanmar solar power generation time per year

## Overview

---

Solar power in Myanmar has the potential to generate 51,973.8 TWh/year, with an average of over 5 sun hours per day. Even though most electricity is produced from hydropower in Myanmar, the country has rich technical solar power potential that is the highest in the region; however, in terms of installed capacity, it is the lowest. Except where otherwise noted, content on this site is licensed under a Creative Commons Attribution 4.0 International License. Official and up-to-date data of Myanmar for all years of statistics, in an easy-to-read format. 6 kilowatt-hours per square meter (kWh/m<sup>2</sup>) per day on a horizontal surface in the dry zone (Mandalay, Sagaing, and Magway regions). Myanmar thus has greater energy generation potential and more options for meeting its needs. Gain comprehensive insights into the statistics and metrics surrounding the solar production industry in Myanmar (Burma). On average, there are 2991 hours of sunlight per year (out of a possible 4,383).

## Myanmar solar power generation time per year

---

### Myanmar o Electricity and Renewable energy

Despite that Myanmar has great bio-energy potential, there are still some constraints and barriers that biomass energy utilization could not be easily achievable.

### Solar power in Myanmar explained

Even though most electricity is produced from hydropower in Myanmar, the country has rich technical solar power potential that is the highest in the Greater Mekong Subregion; however, in terms of

### Solar Energy Potential and Applications in Myanmar

As Myanmar is situated in the southeastern part of the Asian Continent, it enjoys abundant sunshine all year around, especially in the Central Myanmar Dry Zone Area; Potential available Solar Energy of

### Myanmar Solar Panel Manufacturing , Market Insights Report

Explore Myanmar solar panel manufacturing with market analysis, production statistics, and insights on capacity, costs, and industry growth trends.

### Design and Calculation of Solar Power Plant in Myanmar

[Solar power generation , Myanmar - yearly data, chart and table](#)

Official and up-to-date data of Myanmar for all years of statistics, in an easy-to-read format. Analysis of solar power generation with advanced tools for comparisons, trends, shares, and various metrics.

is an Open Access article distributed under the terms of Solar power in Myanmar has the potential to generate 51,973.8 TWh/year, with the Creative an average of over 5 sun hours per day.

**World Bank Document**

During the period 2015-2021, the electricity sector of Myanmar was on a steady development pathway, with a fast-expanding power generation base, relying on natural gas, hydropower, and solar to meet

**Solar power in Myanmar**

Solar power in Myanmar has the potential to generate 51,973.8 TWh/year, with an average of over 5 sun hours per day.

**Solar Photovoltaic Power Generation in Myanmar**

Solar power in Myanmar has the potential to generate 51,973.8 TWh/year, with an average of over 5 sun hours per day.
