

# National Standards for Lightweight Photovoltaic Panels

Application scenarios of energy storage battery products

## Overview

---

This guide explains how UL and ASTM standards, as well as FCC Part 15 and other requirements, apply to solar panels sold in the United States. The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing solar deployment. Technological advances, new business opportunities, and legislative and . The intent of this brief is to provide code-related information about photovoltaic systems to help ensure that what is proposed regarding the photovoltaic 'product' itself, including accessories such as inverters and controls, as well as their individual and collective installation can be verified . There have been changes throughout the entire 2023 NEC that may affect the installation of photovoltaic (PV) systems. Article 690, Solar Photovoltaic (PV) Systems Part v. Grounding and Bonding. Part VI. Source Connections. This Part Was Previously entitled Marking. Article 691 Large-Scale Photovoltaic (PV) Electric Supply Stations. See Photo 3. Article 705 Interconnected Electric Power Production sources. Part II. Microgrid Systems Part III. Interconnected Systems Operating in Island mode. Article 710 Stand-Alone Systems Article 480, Stationary Standby Batteries. Article 706, Energy Storage Systems. The sections related to PV Rapid Shutdown in this part have been moved to 690.12. There are three sections in this part now. Section 690.56, Identification of Power Sources, refers to the requirements in article 705.10. Section 690.59, Connection to Other Sources, refers to the requirements in Parts I and II of Article 705. The contents of Section 6 See more on [iaeimagazine Solar ABCs](#)

This guide explains how UL and ASTM standards, as well as FCC Part 15 and other requirements, apply to solar panels sold in the United States.

**Installation of Photovoltaic Systems**

Photovoltaic panels and modules shall be listed and labeled in accordance with UL 1703 or with both UL 61730-1 and UL 61730-2. Inverters shall be listed and labeled in accordance with UL 1741.
