Lithium nickel cobalt aluminium oxides

The lithium nickel cobalt aluminium oxides (abbreviated as Li-NCA, LNCA, or NCA) are a group of mixed metal oxides. Some of them are important due to their application in lithium-ion batteries.

NCA Battery , Composition, Cathode & Applications

The most important advantages are their high cell voltage, high energy density, and no memory effect. NCA batteries are lithium-ion batteries with a cathode made of lithium nickel cobalt aluminum oxide.

Lithium Nickel Cobalt Aluminum Oxide

Lithium nickel cobalt aluminum oxide (LiNiCoAlO₂) (NCA): NCA battery has come into existence since 1999 for various applications. It has long service life and offers high specific energy around good
