

Nigeria integrated solar street light

Overview

Designed specifically for the Nigerian climate, this solar led street light combines a high-efficiency monocrystalline solar panel, a long-life lithium battery, and ultra-bright LED chips into a single, compact housing. This project in Nigeria deployed SLV2-120W all-in-one solar street lights to provide independent nighttime road lighting for communities and public areas. Engineered for efficiency and simplicity, they deliver reliable renewable energy without complex installation. Our solar street lights are specifically selected and configured to perform optimally in Nigeria's climate.
