

Ottawa lithium energy storage power supply procurement

Overview

Through this competitive procurement process, known as the Long-term 1 Request for Proposals (LT1 RFP), the province looked to procure year-round capacity from new build storage facilities larger than 1 MW. The Project will be submitted to the Independent Electricity System Operator's ("IESO") Request for Proposals under the Long-Term . In response to increased demand from expanding electrification and business investment in large energy consuming sectors including transportation, manufacturing, water and building envelope heating, combined with pressures on current supply, the Ontario government is forecasting the province's . Ontario's Independent Electricity System Operator (IESO) has contracted out a 390-megawatt battery energy storage system (BESS), which it says is Canada's biggest to date. The deal is one of 10 recently announced projects that will provide a total of 1,784 megawatts of energy storage. The procurement has resulted in competitive prices for new resources, municipal support, and significant Indigenous participation and equity ownership in projects. The IESO has executed contracts with 13 selected proponents . The Ontario Energy Board follows the government's strict procurement policy for the acquisition of goods and services.
