**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

One of the most obvious differences between the electrical standards of Europe and the U.S. is that of the voltage used: in Europe, it is between 220 V and 240 V, with a frequency of 50 Hz (for example, the UK uses 230 V 50 Hz); but in the U.S. it is half that at 120v, with a frequency of 60 Hz. ## **European Standards Reference Guide**

The EN 50310 standard should be referenced in Europe and should be applied at least in the case of newly constructed buildings and whenever possible in existing buildings.

## **New Standards for External Power Supplies and Adapters**

Outside of the US and EU, countries with significant EPS markets have adopted voluntary and sometimes mandatory programs, generally harmonized with the US and EU standards.

## **External Power Supplies**

The Ecodesign regulation (EU) 2019 /1782 which is in application since April 2020, covers external power supplies with an output power of maximum 250 W, which are intended to work with electrical

## Differences in USA and European AC Panels

All of these supplies are single phase, but there are differences in the supply wire configurations and consequently in the power distribution panel structure. The chart below illustrates the differences.
