

Pei Solar Photovoltaic Power Generation Project

Overview

Slemon Park Microgrid Solar PV Park is a 10MW solar PV power project. It is planned in Prince Edward Island, Canada. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the under construction stage. It will be developed by AKA Energy Systems' Summerside Sunbank Project helps the City of Summerside pave its way to a greener future with the development and installation of solar photovoltaic panels, a Smart Microgrid, and a Battery Energy Storage System. The use of solar energy can lower energy bills for Islanders, working hand-in-hand with other efficiency upgrades. 8 million SREP funding towards Na'ku'set Park Capacity Building Project with Maritime Electric Company, Limited. Prince Edward Island is currently ranked the #1 province in the country for installing a solar power system, scoring as one of the best provinces for cash rebates and utility-related factors. This page contains all relevant information about installing solar in PEI including utility policies. City officials Mike Thususka and Greg Gaudet say Summerside is gaining a growing reputation as a green community, and that has attracted business attention. (Laura Meader/CBC) Summerside, P.

Pei Solar Photovoltaic Power Generation Project

THURSDAY, NOVEMBER 2

This session will deliver a mely update on the state of the labor market today and introduce the new PEI Compensa on Dashboard analy cs tool while highligh ng its benefits to PEI members.
