

Photovoltaic maintenance channel grid plate design

Overview

The modular grid design allows for easy installation and customization to fit various PV array layouts. With high strength-to-weight ratio, it supports regular foot traffic and light equipment, reducing maintenance time and costs while extending the lifespan of solar energy systems. Made from durable fiberglass-reinforced plastic (FRP), it offers excellent anti-slip, weather-resistant, and reducing the cost of O&M and increasing its effectiveness. The actual design criteria .
