

Price of a 20kW photovoltaic container for use on Australian islands

Overview

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000-\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh. At Modbox, we design and build shipping container solar solutions to securely house your solar panels, batteries, inverters, and other equipment. Whether you're powering a remote worksite, an off-grid project, or a backup energy system, our containers are built tough for Australian conditions. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects-all while reducing . Power where the grid can't go - delivered in a single, rugged container. AVID's solar design, installation, commissioning and monitoring services are operated by our teams of skilled engineers and qualified electricians.
