

Renewable energy storage north macedonia

Overview

The government of North Macedonia has approved its annual plan for the construction of energy facilities in 2026, paving the way for nearly 4.42 GW of new clean power generation capacity dominated by solar, alongside wind and gas, in addition to more than 2 GW of energy storage. This unprecedented expansion, driven by the European Union's Clean Energy Package, has led the country to achieve . A significant segment of the plan comprises electricity storage systems: In total, the plan covers 96 energy storage units, with 2?

GW total capacity and 5?

GWh of storage, representing an estimated investment of nearly 2?

billion euros.
