

Rooftop solar panels in North Macedonia

Overview

North Macedonia is preparing to raise the maximum capacity for rooftop solar installations to 10 kW for households and 70 kW for businesses, up from the current limits of 6 kW and 40 kW. The draft legislation also introduces strict timelines for permitting and grid connection. The increasing global focus on decentralized power, particularly rooftop solar, highlights a significant shift in how we think about energy security. While specific details about a 2025 grid failure in North Macedonia are emerging, the incident underscores a much broader international trend: . Macedonian solar panel installers - showing companies in North Macedonia that undertake solar panel installation, including rooftop and standalone solar systems. 15 installers based in North Macedonia are listed below.
