

Singapore schools use off-grid solar-powered containerized wind-resistant models

Overview

More than 180 schools have joined in the SolarNova programme, which progressively installs solar panels on their rooftops. Schools here are going green with efforts to reduce carbon emissions while ramping up on initiatives to educate students on climate issues from a younger age. Made up of more than 800 large-scale battery units that can be individually moved and installed, the system stores excess solar energy generated in the day to be used at times of higher electricity demand. This also created opportunities to advance Singapore's national agenda on sustainable development. Under MOE's Eco-Stewardship Programme (ESP) which .
