

Small solar energy storage in Serbia

Overview

This year, the Serbian government is starting the construction of self-sufficient solar power plants with a capacity of 1 GW together with battery systems for storing electricity. Discover how Serbia is leveraging cutting-edge energy storage solutions to stabilize its grid and accelerate renewable adoption. Explore market trends, project case studies, and opportunities for global collaboration. Serbia's energy landscape is at a crossroads. International companies, financial institutions and agencies such as US Exim, MIGA and the Swedish Export Credit Agency . Now there are plans in place for UGT Renewables and Hyundai Engineering to provide a series of self-balanced utility-scale solar projects bringing reliable, renewable energy to every corner of Serbia.
