

Solar energy policy damascus

Overview

Damascus launches a fixed-tariff scheme for 2-10 MW green power and signs a deal with 20Solar Energy to build twin 100-MW solar plants, one with battery storage. Syria has taken its most decisive step yet toward rebuilding its war-battered power system with clean energy. The former Assad government failed to secure stable energy supplies, and as shortages worsened and fuel prices soared, the regime turned to solar energy projects as an alternative, seeking to mitigate the crisis. 23 was issued by decree from Bashar al-Assad on October 19 . Syria's ministry of electricity has announced a new 100-megawatt photovoltaic power station to be built to tackle the nation's energy crisis, following over a decade of unrest and economic uncertainty in the country. The solar power station, which would be based in the Damascus countryside, is part . Positioning renewable energy as a cornerstone of its economic revival, Syria hosted its Second Electricity Investment Conference on June 19-20, 2024. Every single member of any household is on full alert. With temperatures rising to 50° Celsius (122° Fahrenheit) in the summer, water is already scarce. This has lessened the load on generators, saving 6,375 litres per year and reducing CO2 emissions by 16.
