

# Solar panel implementation standards

## Overview

---

There are several accredited SDOs developing product standards for the solar industry, including UL and the Solar Rating and Certification Corporation (ICC-SRCC/ICC-ES). Product standards are implemented either through federal, state regulation or building codes and/or municipal . The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing solar deployment. [Click here for report and fill-in forms.](#) The California RPS program was established in 2002 by Senate Bill (SB) 1078 (Sher, 2002) with the initial requirement that 20% of . SEIA monitors and participates in the development of product standards and building codes on behalf of the solar industry. SEIA routinely collaborates with standards developers, code developers, firefighters and other organizations to create market-friendly and effective requirements for the U.
